The simple 12V battery status indicator is a circuit that shows the battery state only by flashing LEDs. For example, if out of 10 six LEDs are glowing it means 60 percent of the battery power is left. When the battery is fully charged the circuit LEDs will turn on, and the LEDs will turn off one by one as the battery runs down.

With its JST connector for external power, can measure a voltage of receiver battery. The LCD screen can show 6 cell batteries" condition. Only 3 control keys, easy single-hand control.
