In even simpler terms, the lithium batteries effectively store solar power from the sun and act as an energy buffer in an RV.. While AGM (or lead-acid) batteries are a viable alternative, lithium batteries have additional advantages. For example, users can typically use approximately 50 percent of the power from an AGM battery before recharging.

It's time to tell the truth about RV solar and lithium batteries. Not that they aren't great to have. It's just that too many RVers have been talked into getting solar/lithium packages by unreasonable claims by RV salespeople who just don't understand the limits of the technology. Let me be very clear: We've been using RV solar and lithium batteries since 2015. Jen and I ...
