220v mobile power solar

Lets say I wanted to use solar power to operate a 3/4 hp well pump that runs off of 220 AC, how many solar panels, how big of an inverter, and how many batteries would I have to have for this to work?

Matters if you're 220V or 240V. $20/60 \text{ hr} * 220\text{V} * 10\text{A} = 733\text{Wh}$ $10\text{A} * 220\text{V} = 2200\text{W}$ The killer is the "locked rotor" or "surge" current of the rotor. It's commonly 5X the run current. My neighbor has a 3hp deep well pump with a 12A run, but a 60A surge. This means his inverter has to supply 14.4kW of power briefly while the pump motor spins up.
