Mersen R-Rated fuses are current-limiting, high interrupting rating fuses intended for the short circuit protection of medium voltage motors and motor controllers. R-Rated fuses are back-up fuses that have a minimum interrupting rating, and must be coordinated with overload relays in combination motor starters. The motor starter manufacturer generally specifies the R-Rated ...

The three-phase bridge inverter circuit has three legs, each with two switching states, so there are a total of eight states. When the DC bus midpoint voltage is used as reference, the bridge leg voltages in eight different states are shown as below (Table 1). The switch function Sx = 1 (X = A, B, C) represents the corresponding connected positive busbar, ...
