PERC solar cell technology currently sits in the first place, featuring the highest market share in the solar industry at 75%, while HJT solar cell technology started to become adopted in 2019, its market share was only 2.5% by 2021. TOPCon, which is barely present in the market, already represents 8% of the PV market, but it might start to grow in 2023 as major ...

The AS-7M156-HC-570W600W solar module by Amerisolar is a high-quality and efficient solution for harnessing solar energy. With a power output ranging from 570W to 600W, it offers exceptional performance and reliability. The module utilizes advanced half-cell technology, which increases its power generation capacity and improves overall efficiency.

As the industrial pioneer of heterojunction technology in China, Huasun has delivered over 1GW of HJT products to over 20 countries around the globe. Huasun now ranks as the largest HJT manufacturer in the world. High-efficient HJT solar cells and modules. Make Order Now!

In the solar world, panel efficiency has traditionally been the factor most manufacturers strived to lead. However, over the last 3 to 4 years, a new battle emerged to develop the world's most powerful solar panel, with many of the industry's biggest players announcing larger format next-generation panels with power ratings well above 600W.
