In this regard, Subramaniam et al. proposed a hybrid PV-battery system having DC-side coupling considering a power balancing control (PBC) to relocate the potential to the battery and the grid/load. A solar power conditioning system (PCS) behaves as an annexation across the battery, PV source, and central grid/load.

Here's the wiring diagram showing how to connect a solar panel to a battery: It's important to understand the following: Don't connect a solar panel directly to a battery. Doing so can damage the battery. Instead, connect both battery and solar panel to a solar charge controller. It's recommended you fuse your system.
