The European Association for Storage of Energy (EASE), established in 2011, is the leading member-supported association representing organisations active across the entire energy storage value chain. EASE promotes the deployment of energy storage to support the cost-effective transition to a resilient, climate neutral, and secure energy system.

Mechanical energy storage systems take advantage of kinetic or gravitational forces to store inputted energy. While the physics of mechanical systems are often quite simple (e.g. spin a flywheel or lift weights up a hill), the technologies that enable the efficient and effective use of these forces are particularly advanced.

PESA works for the development of the energy storage industry and energy transformation. It participates in legislative work, shaping non-legislative activities and conducts educational and information activities. PESA promotes safety standards for the use of energy storage, taking into account legal, technical and economic security.

The Ohio Energy Storage Association (OESA) is technology agnostic, with a commitment to advancing the role of energy storage through policy, education, outreach, and economic development. OESA is supported by the contributions and coordinated activities of its members.
