RV lithium batteries are rechargeable 12-volt batteries that have become a popular alternative to lead-acid batteries, particularly for RVers who spend a lot of time off the grid and/or who use solar power. RV lithium batteries are based on a newer, more efficient lithium-ion technology known as lithium iron phosphate (or LiFePO4 for short).

Episode 85 - Emilie Bodoin is the founder and CEO of Pure Lithium a start-up focused on changing the way lithium metal is made and greatly enhancing the quality vs the current state of the art. The original patent for rechargeable lithium batteries goes back to the 1970s and was based on using lithium metal.
