If you have problems with an app that drains your battery, you can force close it. From the Apps menu (accessible by swiping up on the screen > Settings > Apps), choose an application and choose Force stop.; Note: This does not work for all apps and services, and when you stop some of them, your device may (temporarily) stop working properly. So be careful which app you stop.

4 · The higher the DoD limit, the more of a battery's capacity you can use. If a battery has 90% DoD, for example, you can use 90% of its energy before it needs to be recharged. Lithium-ion and flow batteries tend to offer the highest DoD, meaning you can use more stored energy ...

Last Charged: Indicates how fully the battery was last charged and the time it was disconnected. Battery Level graph (in Last 24 Hours): Shows the battery level, charging intervals, and periods when iPhone was in Low Power Mode or the battery was critically low.
