Since watts = amps \* volts divide the watt hours by the voltage of the battery to get amp-hours of battery storage  $\text{Amp-hours (at 12 volts)} = \text{watt-hours} / 12 \text{ volts} = 1470 / 12 = 122.5 \text{ amp-hours}$ . If you are using a different voltage battery the amp-hours will change by dividing it by the battery voltage you are using.
