Why? I have come across in my car battery reading 12.6 v but still indicator is white which is for needs charging. So, serviced for regular charging and took about 2 hrs for the indicator to show green. But, if battery still shows white and shows 11 v, then, regular charging to regain 12.6 v and green colour takes about 10 hrs.

I just got a new battery for my Dell Inspiron 5593 laptop, but it will not charge. I plug in the adapter and the indicator light next to the port briefly comes on then goes off. If I keep it plugged in, the charge on the battery pretty much stays where it is at, around 55%, which I assume is the charge left from the new battery itself.

If your battery indicator is not showing any light, it may indicate that your battery is fully drained or not connected properly. In such cases, try recharging your device or ...
