Copper holds up better than aluminum at high temperatures. For example, inside battery packs, OEMs are looking for materials that can withstand up to 1,000°C for short periods, making copper the preferred conductor inside the pack for many OEMs. For the same ampacity, aluminum is 40 percent lighter than copper, so it makes sense for

Battery copper bar price in Chad

The red circles show data from 5 electric vehicle battery busbars. The current is an estimated continuous rating and plotted versus the cross-sectional area in mm². The gradient of the "straight line fit" shows that 5.9A/mm² is a rough estimate for copper busbar size. However, to be on the safe side of this I would initially size at 5A/mm² before doing the ...

Battery copper bar price in Chad

Use copper. I found copper stock in all kinds of sizes and lengths. I have four Chins in a 2s2p 24-volt bank using all copper bars. I can look it up, but I think I paid \$74 for two 1/4"x1.5"x24" copper bars. these are the positive and negative parallel buses. The series bars are 3/16"x1"x6", and I cut to length then drill to go over the terminals.

Find wholesale copper bars manufacturers from China, India, Korea, and so on. ...
