I just swapped (using this guide) my 749"s Ducati Performance pressure plate onto my new 1098. In turn, I installed the stock pressure plate and such from the 1098 onto the 749 (2005) and put on the 1098"s cover. I can"t believe it!! The 749"s clutch is still much louder--even with the cover on than the 1098"s is with an open cover!! CRAP!
