When your car or other property is damaged or destroyed in an auto accident that's the other driver's fault, you're entitled to be made whole for your losses. The fact that the insurance company holds the purse strings doesn't mean it has the only say in how much compensation (" damages," in the language of the law) you're entitled to receive.

A rear-end car accident can cause problems for you long after any superficial damage is fixed, if unseen problems are left unchecked. Even seemingly-minor damage, such as misalignments or a faulty light can turn into much bigger and costly problems over time.
