Anker's ultra-compact Nano Power Bank comes with a built-in USB-C cable for seamless connectivity to your smartphone, specifically Android devices and the new iPhone 15 line-up that uses USB-C. It can recharge your phone to 50% in 30 minutes thanks to a powerful 30w supply and can be recharged to 50% in 45 minutes. Standout features you'll love include a ...

This shouldn't be an issue with modern-day power banks, but let's say, for example, your phone battery charges at a minimum of 5V and the power bank used to charge it is <5V, say 4.5V, the phone won't even charge in most cases, and not only that, but whatever juice you have left in your phone will eventually drain out.

5 · While some do offer this, many still rely on a 1A input which will take longer to reach a full charge. Hot Tip: Newer power banks can be charged even more quickly with the addition of a 2.4A input option. Look out for these if you want the fastest charge on the market. The 11 Best Portable Power Banks for Travel 1.
