During a 42-fold increase in China's cobalt refinery production from 1999 through 2005, the country that historically mined most of the world's cobalt--the Democratic Republic of the Congo (DRC)--had just begun to rise from a socioeconomic collapse and two African wars over its territory and resources () fore these crises, DRC copper-cobalt mines were industrial (also ...

Precursor plant location. Stakeholders suggest that this remains a point of disagreement between the DRC and Zambia. The governments initially agreed to construct the precursor plant in a cross-border special economic zone, but it seems that this shared site may be ultimately deemed unviable. The plant will therefore likely sit in one country or the other, and ...

The economy of the Democratic Republic of the Congo has declined drastically around the 1980s, [15] despite being home to vast potential in natural resources and mineral wealth; their gross domestic product is \$69.474 billion as of 2023.
