VIFLY WhoopStor 3 - 1S LiPo Charger and Discharger with Storage Mode . Leaving any battery at high voltage or full charge for too long is probably the primary killer of tiny whoop batteries, to ensure your 1s battery longer using time and better performance, please store your batteries at a storage charge, not fully charged nor completely empty.

Many battery chargers are available on the market, but few of them are universal chargers. Using our kit, NiCd and NiMH batteries or different can be charged both quickly (52 minutes) and normally (14 hours). In order to ensure that the battery is fully discharged prior to charging and thus has a longer life cycle, an automatic discharger is also fitted.
