The global energy storage system market is forecast to grow steadily between 2024 and 2031 with a compound annual growth rate of approximately nine percent.

Energy storage system costs stay above \$300/kWh for a turnkey four-hour duration system. In 2022, rising raw material and component prices led to the first increase in energy storage system costs since BNEF started its ESS cost survey in 2017. Costs are expected to remain high in 2023 before dropping in 2024.

That's why we developed a first-of-its-kind ranking methodology.
