This post will walk you through installing solar street lights, from selecting the suitable model to setting up the

How to connect the solar street light branch line

system and connecting it to the power grid. With the proper knowledge and a few ...

In lighting applications, Photocells are placed in streetlights to control when the lights are ON or OFF. During daylight, light falling on the photocell causes the streetlights to turn off and during night hours or darkness to turn on. Thus energy is saved by ensuring the lights are only on during hours of darkness.
