2. Install battery retention strap through openings in rear of battery cabinet. Orient the buckle per Figure 17. 3. Secure the battery cabinet to the relay rack with the provided 12-24 x 1/2" hex head thread-forming screws (ten per side) (P/N 218710500) and #12 ground washers (five per side) (P/N 215640600). Torque these connections to 35 in-lbs.

The static voltage stabilizer is mainly composed of control system, SCR modules and compensation transformers. When the control system detects the input voltage fluctuating, it sends signal to the drive boards to control the SCR modules fast zero-crossing switching, plus the transformer extra compensation, the voltage stabilizer achieves highly stable output voltage.
