Here the authors report that, when operating at around 60 °C, a low-cost lithium iron phosphate-based battery exhibits ultra-safe, fast rechargeable and long-lasting properties.

the battery pack was placed on two 750-W heater strips to induce thermal runaway. Eighteen K-type thermocouples were attached to the outer cell surfaces of the battery pack to measure the battery temperature as shown in Fig. 2. For each test, when one battery cell reached thermal runaway, the heaters were turned off and the re suppression system
