My 2013 P85+ got the infamous bms_u029 "Charge level reduced" last week and after reading up on the forum and going back and forth with Tesla Service I decided to write up what I learned. Much of this info is available on this forum but buried in various threads. My hope is to make this post...

The plan for Tesla is that if a battery dies, to only replace the defective module, not the whole pack. On the downside, you're not getting a whole new pack. On the upside, a module probably only currently costs Tesla a bit over \$2k (vs. ~\$10k for a full pack), so add labour and any service margin to that.

We have a 30,000 SqFt warehouse and two battery assembling lines in Richmond, California. At BatterySpace, we provide all your needs for custom batteries. We carry a full line of different ...
