Recycling No battery lives forever. But when they contain recyclable materials, they re always valuable. By

recovering used batteries and recycling them into raw materials for new batteries, we"re lowering the demand

for fresh material and moving closer to ...

Chinese solid-state battery startup Talent New Energy has unveiled a new all-solid-state battery cell with

ultra-high energy density, as the industry's quest for new battery technology continues to advance. ...

all-solid-state lithium metal battery prototype with a single cell capacity of 120 Ah and a real-world energy

density of 720 Wh/kg, the ...

Beijing Betavolt New Energy Technology Company Ltd claims to have developed a miniature atomic energy

battery that can generate electricity stably and autonomously for 50 years without the need for charging or

maintenance. It said the battery is currently in the pilot stage and will be put into mass production on the

market.

In addition, BNEF's report finds that investment in the global clean energy supply chain, including equipment

factories and battery metals production for energy technologies, hit a new record at \$135 ...

Discover how the U.S. is shifting to renewable energy sources, even in oil and gas regions, in this interactive

report by The New York Times.

New York, January 30, 2024 - Global investment in the low-carbon energy transition surged 17% in 2023,

reaching \$1.77 trillion, according to Energy Transition Investment Trends 2024, a report published today by

research provider BloombergNEF (BNEF). This number is a new record level of annual investment and

demonstrates the resilience of ...

It comes as the fund makes its debut investment in renewables developer Exagen to build new green energy

and rapidly grow the UK's energy storage capacity. The EUR220 million OEDP focuses on investing in early

stages of building new green energy, vital to help reduce Europe's dependence on gas imports and to lower

energy bills in future.
