In other words, a Type I travel adapter. Recommended New Zealand Travel Adapters. AC Power Travel Adapter (cheap) Skross World Travel Adapter (use it all over ...

Watt hours are a measure of a battery's power capacity. For example, a 50 Wh battery can deliver one watt of power over 50 hours, or 5W of power for 10 hours. Higher capacity means more risk. That's why we limit the number of devices and batteries you can carry. Batteries are also measured in Amp hours (Ah), or milliamp hours (mAh).

If the machine is new (rather than new-to-you) and only a month old, it should still be covered under warranty. You need to contact HP Worldwide Limited Warranty and Technical Support. They may be able to replace just the power supply, but they may want to swap out the entire machine. Contacting them directly is the only way to be sure.

You may still have some power due to a generator or battery, but using the appliances can quickly drain these devices. You may notice a loose plug, or that the cord is pulled away from the plug, exposing live wires. If this is the case, the plug is likely not getting a stable connection and will stop working.
