

The Electric Power Research Institute (EPRI), the US Department of Energy's Pacific Northwest National Laboratory (PNNL), and German battery analysis specialist Twaice have jointly evaluated 26 ...

A full-service cloud platform with battery analytics and battery monitoring software for optimizing safety, reliability, and lifetime of battery-powered assets.

Zheng 7 adopted finite element analysis software to conduct lightweight design optimization of a specific brand"s new energy vehicle battery pack enclosure. It"s noteworthy that their optimized ...

SolarPlus V4. Best software for developing advanced energy storage and off-grid systems. Developed by Australian Solar Industry Guru Glen Morris, SolarPlus is one of the most powerful and advanced solar design software packages, designed especially for the Australian market. It features an integrated CRM, battery and energy storage performance ...

A comprehensive analysis of New Energy Vehicle risk characteristics. The world's Vehicle Electrification Revolution is progressing rapidly, and China has been at the forefront of it, not only from a production and technology viewpoint, but also in the motor insurance industry. China uses a broader definition of New Energy Vehicles (NEV), including but not limited to battery EV, ...

Our predictive battery analytics platform leverages AI and cloud computing to monitor your entire Li-ion battery fleet. See how we have helped others make data-driven decisions that solve specific battery challenges.

China Automotive Battery Innovation Alliance (CABIA), on January 13, published battery data for new energy vehicles (NEVs) for 2020. Last year, the cumulated production yield and sales volume of batteries were 83.4 gigawatts (GWh) and 65.9GWh, respectively, down 2.3% YoY and 12.9% YoY due to the pandemic outbreaking at the ...

Battery analytics and intelligence solutions can offer critical insights that allow operators to monitor factors like temperature, cycling rates, and overall battery ...

According to EIA data, new energy storage installations in the United States reached 4.55 GW from January to October 2023. EIA forecasts project an additional 3.8 GW to be installed from November to December, bringing the total for 2023 to 8.35 GW--a year-on-year growth of 102%. However, compared to last month's forecast capacity of 8.55 GW, there''s a ...

What are the challenges? Grid-scale battery storage needs to grow significantly to get on track with the Net Zero Scenario. While battery costs have fallen dramatically in recent years due to the scaling up of electric vehicle production, ...

Tools for a new energy model. Our advanced software solutions combine artificial intelligence, automatic learning algorithms, Big Data analytics and blockchain technology to create tools ...

Production, sale, installation, and market share analysis. The production, sales, installation, and market shares of China's NEVs and power batteries were analyzed. This analysis examined how these factors affect carbon mitigation. These analyses are crucial because they have an impact on national and international market outcomes by influencing the ...

From battery manufacturing to multiphysics system optimization, Altair's battery design and simulation software provides a holistic approach to battery-powered mobility. Connected multidisciplinary workflows enable product developers to ...

The box structure of the power battery pack is an important issue to ensure the safe driving of new energy vehicles, which required relatively better vibration resistance, shock resistance, and ...

Advanced energy modelling software, that's easy-to-use . Evaluate hundreds of solar and battery solution in seconds and empower your entire team to quickly assess the financial viability of new energy projects with ease. Explore the platform. Manage your energy asset portfolio on autopilot. Financial and carbon performance tracking of your solar, battery and EV charging ...

ACCURE's predictive battery analytics platform simplifies the complexity of growing fleets of utility-scale battery energy storage. It has the analytical depth, breadth, and automation required to create an accurate and complete picture ...

RTE has described Ringo as "piloting a system of software-controlled batteries," helping to absorb excess local renewable energy that can be released as needed elsewhere on the transmission system. As of 2019, about 23% of metropolitan France's electricity consumption was covered by renewable energy and the nation needs to go much further, in ...

568 G. Ruan et al. Table 1. Material properties of the aluminum alloy box Material Elastic Poisson''s Density Yield strength model modulus [GPa] ratio [kg/m3] [MPa] 6061-T6 72 0.33 2800 276

Experts investigate the root cause of the 2019 fire and explosion at a 2MW BESS in Arizona. Image: APS. Battery storage failure incidents have dramatically decreased in frequency in the last few years, but the industry still needs to be more transparent and share data when incidents occur.

PowerUp advanced battery analytics software generates value from your Lithium-ion batteries, regardless their chemistry or manufacturer. Ensure an optimized and safe usage of your ...

Dr. Matthias Simolka is a product manager and part of Technical Solution Engineering at TWAICE, a cloud-based battery analytics software provider headquartered in Germany. Matthias bridges the gap between Sales, Product and Tech, working with all teams to ensure maximum value and the optimal solution is delivered to battery customers.

HOMER (Hybrid Optimization of Multiple Energy Resources) software navigates the complexities of building cost effective and reliable hybrid microgrid and grid-connected systems that combine traditionally generated and renewable power, ...

The study concerns a comparative analysis of battery storage technologies used for photovoltaic solar energy installations used in residential applications. Battery storage is needed because of ...

Developers in the US plan to install 15GW of new utility-scale battery storage this year, adding to about 16GW of storage installed so far, according to government statistics. Analysis from the Energy Information Administration (EIA) of the US Department of Energy (DOE) found that by the end of this year the cumulative installed base will have doubled to ...

EnergyTrend is forecasting that large-scale energy storage installations in the US could reach 11.6GW/38.2GWh in 2023. Finally, the research firm said it expected the growth rate of European energy storage ...

The majority of battery demand for EVs today can be met with domestic or regional production in China, Europe and the United States. However, the share of imports remains relatively large in Europe and the United States, meeting more than 20% and more than 30% of EV battery demand, respectively.

Subscribe to Newsletter Energy-Storage.news meets the Long Duration Energy Storage Council Editor Andy Colthorpe speaks with Long Duration Energy Storage Council director of markets and technology Gabriel Murtagh. News ...

ION Energy on the other hand more explicitly joins the dots between hardware and software. The Mumbai, India-headquartered company was contracted last year to use its platform, Edison Analytics, to manage battery cell degradation across a portfolio of around 600MWh of assets for US energy storage developer esVolta.

RIL's aim is to build one of the world's leading New Energy and New Materials businesses that can bridge the green energy divide in India and globally. It will help achieve our commitment of Net Carbon Zero status by 2035.

Based on the new energy vehicle battery management system, the article constructs a new battery temperature prediction model, SOA-BP neural network, using BP neural network optimized by SOA ...

Bloomberg New Energy Finance (BNEF) sees pack manufacturing costs dropping further, by about 20% by 2025, whereas cell production costs decrease by only 10% relative to their historic low in 2021. This warrants further analysis based on future trends in material prices.

Located near a wind farm and sited at the 220/132kV Jhimpir-1 substation, NTDC is seeking an engineering, procurement and construction (EPC) contractor for the battery plant's installation. Works will mainly include designing, manufacture, delivery, installation, testing, commissioning and full completion of works and services on a turnkey ...

The BESS commissioning phase is the first and crucial operational step for companies to become profitable with big batteries. Dr Kai-Philipp Kairies of ACCURE provides insights into typical technical ...

ACCURE's analytics software transform battery data into business intelligence, increasing profitability by advancing safety, reliability, and sustainability. Solutions. Solutions. Solutions. Software . Predictive Battery analytics Platform. Improve safety, drive performance and extend lifetime. Use Cases. Retiring batteries. Planning end of life and calculating residual value. ...
