But what's most important is finding a Passat battery size that's going to fit your car just like the original. The physical shape, where the posts are on the case, and the reserve capacity are all important details. Although BCI Group Size 48 and 94R are common options, there might be a different size that fits your car instead, and our ...

2014 Passat Battery Replacement Q& A. Volkswagen Battery Replacement FAQ. How much to replace the battery in my Volkswagen? Depending on power, size, and quality, prices for a replacement car ...

Lead-acid batteries are strange beasts. My Dad played with various schemes of maintaining lead-acids many years ago. IIRC, assuming you start with a fully charged battery, he found that using a regular charger on a timer such that it would charge the battery for a brief time every day (30 min or so) worked better than a

Passat original battery

trickle charger.

WAGON, 72 amp hour. Battery - Repair or Replace. As vehicle electronics become more and more sophisticated, replacing a battery becomes less straightforward. Our technicians will ...

Nearly every car battery gets recycled into new batteries, making car batteries one of America's most recycled products. Virtually every battery manufactured gets recycled. In 2015, car batteries had a 99% recycling rate, according to the U.S. Environmental Protection Agency. Car batteries are more recycled than paper (65%), glass (26%), and ...

Backstory: Car is an '09 Passat TSI, 101,000 miles, original battery. Two days ago car won't start. Stupid me I had noticed the starter didn't spin with as much vigor in the last few weeks. I get a jump. It takes awhile for the car to turn over. Drive it home. It must have been in a safe mode as the car wouldn't shift out of third gear and the ...

My 2012 Passat battery stranded me at the airport in 0F weather. The car is not yet 3 years old. my 05 Passat TDI the battery lasted only as long. I am very disapointed with the OEM battery and am looking at a 850 CCA AGM Diehard. We had a heck of a time getting it started, good heavy jumper cables and just about started when it did.

Lead-acid wet cell: original type of rechargeable battery Lead-acid gel cell: mixtures of silicon are added to battery acid transforming the electrolytes into a gel substance that cannot leak. Absorbed glass mat (AGM): electrolytes are separated by a fiberglass mat and function as a sponge producing high output power.
