Benchmark Mineral Intelligence assesses lithium ion batteries prices each month across different chemistries, formats and regions. Find out the global weighted average and large contract ...

In 2022, global lithium ion battery exports reached a total value of \$3.26 billion. Thanks to their high energy density, minimal memory effect, and low self-discharge rate, lithium ion batteries are among the most commonly used rechargeable batteries in portable electronics.

In this type of battery, lithium migrates through the power source from one electrode to the other as a lithium-ion. Being the lightest metal, it has the most substantial electrochemical potential in comparison to any other element. This quality allows a lithium-based battery to store a lot of energy in a small and lightweight battery.
