Since wireless charging is still relatively new - mostly being trialled on taxis and buses - there's limited information on how fast it works in a domestic setting. However, wireless charging can replenish a bus's battery in around 10 minutes, allowing it to keep going without needing a full charge for 16 or 17 hours.

Energizer - Ultimate Lithium 20,000 mAh 20W USB-C PD & 15W Qi Wireless 4-Port Portable Battery Charger Power Bank with LCD Display - Black User rating, 4.4 out of 5 stars with 152 reviews. (152)

No, wireless chargers should not cause damage to your phone battery under normal use. While wireless charging inherently generates more heat, which could theoretically affect the lifespan of your battery, modern phones and wireless chargers are designed to manage this heat effectively, making any impact on battery life negligible.

One of the key reasons to use wireless charging is convenience; if you want speed then wired charging is still the way to go. Apple's official MagSafe Battery sells primarily on convenience. It's a white brick that magnetically attaches to any MagSafe-compatible iPhone - basically an iPhone 12 or newer - for Qi charging, but you can use it with any Qi-compatible ...

Buy Carson and Quinn 5k mAh Magnetic Wireless Charging Battery Pack for Apple iPhone and Qi-labeled Devices (Sunkissed Dreams Blue/Neutral, 5K): Portable Power Banks - Amazon FREE DELIVERY possible on eligible purchases
