How long do RV batteries usually last? The lifespan of RV batteries can vary depending on several factors: a) Battery Type: FLA batteries typically last between 3 to 5 years, while AGM batteries can last between 4 to 7 years. Li-ion batteries have a longer lifespan, ranging from 8 to 15 years.

Are Lithium RV Batteries Worth The Money? For reference, some of the best deep-cycle lead-acid batteries for RV cost less than \$200. By contrast, the average cost of an RV lithium battery in today's market can easily exceed \$1300. If you are looking at initial cost alone, lead-acid batteries are still the way to go.

Comparing Lead Acid to LiFePo4 is a complex issue, as it is not just a matter of the so called 50% rule, but also charging / discharging losses which are MUCH higher with lead acid (on the order of 10-20 times higher), there is also voltage sag at high discharge rates which can cause an inverter to cut out on a lead acid battery when it is ...
