In Fig. 9.6, we have plotted $|H(\omega)|$ for $b_1 = \omega_0 = 1$. Notice the bandpass characteristics; the amplification diagram goes to zero at both ends. The resonance peak is still at $\omega = \omega_0 = 1$ and the peak gets higher and sharper with increasing Q . In a lowpass filter, you try to keep the peak as low as possible, but in a resonance filter, the ...
