USE ONLY HAYWARD GENUINE REPLACEMENT PARTS 2 Introduction Description The GVA-24 Hayward Valve Actuator rotates 2-port and 3-port valves automatically. Use it with the Pro/Aqua Logic system or GL-235 Solar Controller to automate pool/spa operation, solar heating, cleaner operation, water features, or a variety of other uses.

The Second Type Of Backflow Preventer Is The Double Check Valves. Double check valves (DCV, also called double check assemblies or DCA) are a good choice for underground or indoor installations. A DCA consists of an inlet shutoff valve, two independently operating spring-loaded check valves (usually inside a single valve body), four test cocks ...

Ball Check Valve Diagram. Like other valves, a ball check valve has a body, seat, and an obturator. But its key feature is its mechanism to prevent backflow via a ball and spring system. Ball Check Valve Diagram. When the pressure upstream increases to a certain point, the valve opens and allows flow in the desired direction.
