To charge the remote with solar energy, simply set the TV remote down with the solar panel facing up. You can do this in your living room while your lights are turned on, or ...

This is because temperature affects the efficiency of a solar panel. For example, a 100-watt solar panel at about 70°F temperature will become an 83-watt panel at 110°F. That being said, if your solar panels are regularly exposed to rainy or cold weather, a PWM controller's input voltage ratings will pull down as the temperature drops.
