This refers to the mounting system where the orientation, angle, etc. remain unchanged after installation. The fixed mounting method directly places the solar photovoltaic modules toward the low latitude area, at a certain angle to the ground, to form a solar photovoltaic array in series and parallel, so as to achieve the purpose of solar photovoltaic power generation.

100% brand new and high quality Features: High-quality material: The solar support assembly is made of anodized aluminum alloy AL6005-T5 material, which has the characteristics of high strength, corrosion resistance, UV resistance, high frequency insulation, etc. Use, durable. Applicable scene: The solar panel bracket is suitable for supporting grid-connected and off ...

Small size, space saving : It is convenient to install a single photovoltaic panel, and the installation space can be adjusted according to the size of the module. Easy installation : The bracket accessories are small and simple, highly pre-assembled from the factory, and only need to be fixed on the balcony for installation, achieving fast, simple and cost-effective installation, which ...
