another property about 10 yrs ago I was told panels on a flat roof could be mounted on a support to be at the correct angle.

Adding solar panels to your garage roof can be a great way to increase the overall size of your solar panel system. Now, this is one scenario where having a detached garage will make things a little more complicated. If your garage is attached to your home then it is easier to connect your garage's solar array to the main home's array and ...

Can a garage roof support the weight of solar panels? The average weight of a standard solar panel is between 18 kg to 20 kg per panel (around 5 kg to 10 kg per square metre). Most garage roofs can usually support this added weight, but it's crucial to have an installer assess the roof's structure before you go ahead.. If there's any doubt ...

Water-shedding and warranted. Timberline Solar(TM) is made up of shingles, not panels or heavy tiles. These shingles are water-shedding, strong and warranted to withstand winds up to 130 mph. Rack-mounted solar installations--where the solar is separate from the roof--require the drilling of dozens of holes into the roof membrane. Any resulting ...
