Abstract. The design of the latent heat thermal storage system (LHTESS) was developed with a thermal capacity of about 100 kW h as a part of small solar plant based on the organic Rankine cycle (ORC). The phase change material (PCM) used is solar salt with the melting/solidification temperature of about 220 °C. Thermophysical properties of the PCM were ...

It has been shown that over the life cycle of 20 years, the stainless steel and the aluminium solar water heaters are capable of respectively producing 16.5 MWh and 21.3 MWh of energy. For ...
