

Sunroom solar powered roof

With solar panels on your roof and batteries in your home, the power is in your hands. Our climate is changing, and our energy system needs to change with it. Delivering electricity across long power lines from big power plants is leading to more power outages, rate increases, and dangerous conditions.

Installing solar shingles is normally cost-effective only if your roof already needs to be replaced. While solar panels can be installed in the sunniest place on a roof - or can be tilted to catch the most sunlight - roof tiles can't be adjusted. If the roof is not already oriented to the sun, they will not be efficient at generating power.

Shift, exclusive to California, helps you maximize the value of solar power under the state's new solar policy. The Shift battery stores solar energy throughout the day and shifts it to your home or the grid during peak hours, optimizing potential savings. ... This doesn't mean that the panels on your roof will stop producing electricity ...
