Swiss Battery Removal

Battery life: Our quartz watches are battery operated. The battery life is approximately 24 months from the time of assembly or last service. The battery life depends on a number of factors. A chronograph consumes more energy than a 3-hand timepiece. Light functions also draw energy from the battery.

The Swiss Water caffeine removal method claims that the process uses, "only water, temperature, and time to gently remove caffeine, while preserving all the coffee's original characteristics." The Swiss Water Process Explained. The way the Swiss Water decaf extraction works is actually quite complex. There is a video with a visual ...
