Nowadays we have up-to-date production technology and been acquired ISO 9001:2000 and ISO 9002 for capacitors. Our low voltage capacitors main include two types: Oil-Type and Gas-Filled Dry-Type. Oil type low voltage power capacitors use metal cases.

Decoupling capacitors - can control high-frequency noise, removing voltage ripples from the power supply. Energy storage and supply - deliver stored energy bursts quickly, like a camera flash for example. Signal filtering - they are able to block low-frequency signals and allow higher-frequencies to pass through. Useful in telecommunications.
