Simultaneously enhancing the photovoltaic parameters of ternary organic solar cells by incorporating a fused ring ... The ternary strategy has been recognized as an effective method ...

At present, the global energy demand keeps rising due to population growth. Therefore, large numbers of photovoltaics (PV) are being integrated with power systems. Solar PV's installed power capacity is poised to surpass that of coal by 2027, becoming the largest in the world. The integration of PV has changed the direction of the power flow. Under these ...
