I need to power my canon speedlite 600ex-rt. It has an external power plug for which I can find plenty of battery packs (e.g. Godox). But I just want to plug it into 240V AC supply voltage. I cant find info about what type of power it takes in through the external power plug (apparently it is a quite high voltage, not a usual 4-6V (4xAA)).

Any RF noise from external portable power will be from the DC-DC converters in the battery pack or solar panel, not the PD trigger. You just have to test anything you plan on running. A 4-cell LiFeP04 should give you clean, direct power with out any switching noise, but I"ve also been lucky with any solar panel or USB pack I"ve run.

The external power supply (100-240VAC, 50/60 Hz) can be connected to the LUCAS device and supports prolonged operation as well as charging of the LUCAS Battery while in the device. Compatible with LUCAS 2 and LUCAS 3 devices.

When using a battery, it may be desirable to avoid draining the battery when USB power is available. The options above always run the Teensy processor from the external power. Using 2 diodes, you can automatically switch to the higher voltage. First, a the "5V" pads must be cut apart, as in option #1 above.

The problem is that all the electronics draws a respectable (> 10 Amp) current when everything is on; and since we have a 10 Amp-hour battery, I"d have no juice at all in short order. I decided to buy an external power supply - something that could keep the battery "perked" so that I can pla...
