If there is an easier way to charge a 48V battery bank from a 12 V car alternator, I will be happy to use it. Although this should be easier and more efficient, the 12V -> 48 V DC/DC converters in that power range seem to be uncommon and more expensive than the usual 12V -> 230V DC/AC car power inverters. Daniel

Down side is that I now have 2 completely separate power systems, a 12v for lights and heaters and a 24v/3Kw for my 120v bus. If I wanted to go with a full 24v system and have a common battery bank, I'd have to get a 24v -> 12v converter capable of handling all the 12v loads and startup amps at the same time. Being as that converters are ...
