Find a Supercharge battery near you Once you've selected the perfect battery for your vehicle from Supercharge's extensive range, our " Find a Dealer " map makes finding your nearest reseller quick and easy.

Find local businesses, view maps and get driving directions in Google Maps.

It's reasonable to expect to replace a stick vac battery. I was willing to pay \$99 after four years of use from my V6, and I expect the replacement battery to last for another four years. However, cordless stick manufacturers should do better. They know the batteries will need to be replaced long before the rest of the vac wears out.

The two main stats to look for, according to AutoGuide, are cold cranking amps and reserve power. CCA measures how well a battery can start in cold weather--more ...

This information is typical for the vehicle manufacturer or noted on the battery itself. Assessing Battery Capacity Matching battery capacity with a suitable tender prevents overcharging and ensures proper maintenance. Battery capacity, often expressed in ampere-hours (Ah), can be found in the vehicle documentation or on the battery label.

Fully Charged Battery: A fully charged 12-volt battery should read around 12.6 to 12.8 volts. This is the ideal range for a healthy battery. Partially Charged Battery: If your battery reads 12.4 volts, it's about 75% charged. A reading of 12.2 volts indicates the battery is roughly 50% charged.
